

# Fire Safety

Level: 2

Duration: 1 day

## Aimed at

This course is suitable for individuals responsible for their buildings, including: facilities managers, general managers, safety technicians and contractors.

## Course description & subjects covered

This course is designed to provide an engaging learning environment and delivery style to ensure you are aware of the content of a suitable fire risk assessment, how to use the fire risk assessment, and how the many considerations interact and overlap within fire safety management. A practical, common sense guide to fire safety to allow you to monitor and maintain the required standards.

### This qualification covers the following topics:

- Key legal summary - Regulatory Reform (Fire Safety) Order 2005
- Comparison of building requirements specified in BS9999 and Approved Doc B
- Contributory factors for a fire risk assessment, e.g. travel distances, door widths, occupancy figures, evacuation strategies, early detection and alarm systems, emergency lighting
- Compare, contrast and understand Fire Prevention, Fire Protection and Fire Response

## Assessment

This course is assessed through independent multiple choice questions.

## Entry requirements

There are no formal requirements for this course.

## Candidates required to provide

Learners are asked to bring note paper and pencils

## Cost

£75.00
