

Requirements for Electrical Installations 18th Edition

Level: 3

Awarding body: City & Guilds

Online delivery

Aimed at

This course is primarily aimed at practising electricians with relevant experience and other allied professionals e.g. surveyors, consultants and other trades needing to update and enhance their understanding of IET Wiring Regulations BS 7671.

Course description & subjects covered

The course covers complete standards for the electrical industry in respect of the safe use and operation of electrical equipment and systems.

During this course, you will cover the following subjects:

- Scope, object and fundamental principles of BS 7671
- Definitions used within BS 7671
- How to assess the general characteristics of electrical installation
- Requirements of protection for safety for electrical installations
- Requirements for selection and erection of equipment for electrical installations
- The requirements of inspection and testing of electrical installations
- The requirements of special installations or locations as identified BS 7671
- The information contained within the appendices of BS 7671

Assessment

Open book online multiple choice questions (duration: 120 minutes) at the end of course.

Entry requirements

There are no formal entry requirements for this course. However, learners should have knowledge of electrical installation and electrical science.

Candidates required to provide

N/A*
