

# Diploma in Web Application Development Level 5

Qualification	Duration	Delivery
Gateway Qualifications	1 year or less	Fully Online
RQF Level 5	Flexible	24hr Support

## Course Purpose

The Diploma in Web Application Development, a Level 5 qualification, offers job-ready skills for those who would like to pursue a career in web or software development.

The qualification offers learners with no previous experience in programming a pathway to employment in this occupational area and an opportunity to upskill for those already working in tech-adjacent roles.

## Employment Driven

In practical terms, the qualification gives learners the technical skills to gain employment in a rapidly growing, sustainable economic sector and progress within it.

There are in excess of 2.1 million jobs in the tech sector in the UK of which 130k are unfilled roles in web/software development. The sector is growing 2.6 times faster than all other economic sectors in the UK.

## Outcomes & Assessment

Learners are taught how to create web applications, websites, and digital apps with ecommerce or database functionality for business. Candidates are assessed on the basis of four milestone projects. These projects compose their industry portfolio to showcase their abilities to prospective employers

## Develop In-demand Skills
