

# NEBOSH Certificate in Environmental Management

Awarding body: NEBOSH

Learning hours: 70hrs

## Aimed at

The NEBOSH Certificate in Environmental Management is a globally recognised qualification for those who have Environmental Management responsibilities or anyone wishing to have a career in this area. This course covers the principles of environmental management and is relevant for both UK and international markets. Those who hold this qualification are able to demonstrate environmental excellence and social responsibility, as well as avoiding prosecution, litigation and loss of reputation. Of international relevance, the qualification provides knowledge and skills to support the introduction and maintenance of the environmental management standard ISO 14001 within your organisation.

For some, the NEBOSH Environmental Certificate is a crucial first step towards establishing a lifelong professional career in environmental management. Around two thirds of health and safety practitioners now have environmental management as part of their overall day-to-day responsibilities at work. The knowledge and understanding gained from this course can help you if you have these responsibilities.

## Course description & subjects covered

This qualification has been developed based on extensive research with environmental professionals, employers, professional bodies and regulators to ensure that they remain relevant and rigorous, as well as achievable and practical. Learners will learn how to carry out an environmental review of the workplace and prepare a report to management regarding the review with recommendations for improvement. This qualification covers the practical issues of managing environmental risk. The syllabus takes a risk management approach, based around best practice and international industry standards, including:

- Environmental Management Systems and aspect identification
- Sources and use of energy and energy efficiency
- Control of pollution
- Planning for and dealing with environmental emergencies

**The NEBOSH Certificate in Environmental Management consists of two units, each separately assessed:**

- EC1: Management and control of environmental hazards
- EC2: Environmental practical application

## Delivery and Assessment

No previous environmental management knowledge is required. Learners should note that the assessment includes a requirement to write a short report.

Learners are assessed with a written 2-hour examination for EC1. There is also a practical assessment for EC2, designed to help you apply your learning at work and add value for your employer.

## Cost

Fully funded through the Personal Learning Account\*
