

Aimed at

This course is suitable for anyone interested in pursuing a career in IT.

Course description & subjects covered

The Official CompTIA IT Fundamentals (ITF+) course will provide students with the fundamental IT skills and concepts required to identify and explain the basics of computing, IT infrastructure, software development, and database use. Students will acquire the essential skills and information they need to set up, configure, maintain, troubleshoot, and perform preventative maintenance of the hardware and software components of a basic personal computer workstation and basic wireless devices. Students will also learn to implement basic security measures and implement basic computer and user support practices as well as prepare candidates to take the CompTIA IT Fundamentals (ITF+) certification exam.

Subjects Covered:

- Using computers
- Using apps and databases
- Using computer hardware
- Using networks
- Security concepts

Entry requirements

Learners should hold basic computer literacy, PC operating system navigation skills, internet usage skills and IP address knowledge.
