

Aimed at

This course is aimed at learners with network-related IT experience.

Course description & subjects covered

CompTIA Network+ validates the technical skills needed to securely establish, maintain and troubleshoot the essential networks that businesses rely on.

Unlike other vendor-specific networking certifications, CompTIA Network+ prepares candidates to support networks on any platform. CompTIA Network+ is the only certification that covers the specific skills that network professionals need. Other certifications are so broad, they don't cover the hands-on skills and precise knowledge needed in today's networking environments.

Course Objectives:

- Deploy and troubleshoot Ethernet networks
- Support IPv4 and IPv6 networks
- Configure and troubleshooting routers
- Support network services and applications
- Ensure network security and availability
- Deploy and troubleshooting wireless networks
- Support WAN links and remote access methods
- Support organisational procedures and site security controls
- Summarise cloud and datacentre architecture

Entry requirements

Learners should have basic computer literacy, PC operating system navigation skills, internet usage skills and IP address knowledge. In addition, learners should have a minimum of 9-12 months of network-related IT experience.

Delivery and Assessment

This course is available virtually and self-led. There are no assessments for this course. The course is recommended as preparation for the N10-008 CompTIA Network+ Exam.

Cost

Fully funded through the Personal Learning Account*
