

Aimed at

This course is aimed at learners involved in the installation, management and troubleshooting of servers

Course description & subjects covered

This 5-day course is intended for those wishing to qualify with CompTIA Server+ Certification. CompTIA Server+ is a global certification that validates the hands-on skills of IT professionals who install, manage and troubleshoot servers in data centers as well as on-premise and hybrid environments.

Course Objectives:

- Install, configure and manage server hardware and server operating systems
- Implement proper server hardening and security controls
- Successfully troubleshoot common server problems
- Demonstrate an understanding of key disaster recovery, high availability and backup concepts

Subjects Covered:

- Server hardware installation and management
- Server administration
- Security and disaster recovery
- Troubleshooting

Entry requirements

Learners should be CompTIA A+ Certified or hold equivalent knowledge.

Delivery and Assessment

The course is recommended as preparation for the SK0-004 CompTIA Server+ exam.

Cost

Fully funded through the Personal Learning Account*
