

Awarding Body: Cert-ain or BPEC

Duration: 1 day

Aimed at

This course is suitable for all plumbers and heating engineers looking to gain the knowledge and skills required to deal with unvented hot water systems and cylinders.

Course description & subjects covered

This qualification is a must for plumbers and heating engineers, allowing you to install, commission, and service unvented hot water systems and cylinders.

The course is also often a prerequisite for heat pump courses, as cylinders make their way back into everyday households.

Learners can select from the following awarding bodies: Cert-ain or BPEC.

Assessment

This course is assessed through theory examinations and a practical assessment.

The pass-rate for this course is 100% - operatives are allowed up to 3 attempts.

Entry requirements

Learners must hold at least one of the following:

- ACS
- OFTEC
- N/SVQ Level 2/3 in plumbing (or equivalent)
- N/SVQ Level 2/3 in heating & ventilating (or equivalent)
- N/SVQ Level 2/3 in gas installation/maintenance (or equivalent)
- N/SVQ Level 2/3 in oil-fired technical services (or equivalent)
- Be working towards one (BPEC only)
- Have evidence of a number of years' experience in the plumbing or heating industry (BPEC only)

Cost

Fully funded through PLA Funding*
